

Phonak Audéo™ Marvel

Love at first sound

A Sonova brand

PHONAK
life is on

The all new Marvel hearing aids express our commitment to improving hearing without limitations

For over 70 years, Phonak has continuously strived to create hearing aids to improve people's lives. With every new Phonak product, we've pushed the boundaries of hearing technology to create solutions that deliver excellent sound quality, are easy to use and provide a true sense of well-being.

Our latest creation is the result of years of extensive research & development all coming together in one marvelous piece of technology. We've focused our attention on what you want and expect from a first-class hearing aid – a clear, rich sound experience.

With this philosophy, combined with modern technology, we've developed a multifunctional hearing aid that conveys a love at first sound experience.

Introducing Phonak Audéo Marvel:

- Clear, rich sound
- Connectivity to smartphones (iOS and Android), TV and more
- Rechargeable models
- Smart apps

Love at first sound... each and every day!

- Exceptional sound quality from the first fit²
- Better speech understanding in noise³
- Reduced listening effort in noise⁴
- Top rated streamed sound quality⁵

When we say **love at first sound**, we don't just mean the first time you try on Marvel, but each and every time you wear them!

From the moment you first put on your Marvel hearing aids, you can expect a sound quality second to none. We've accomplished this by taking the proven performance of our technology and improving it in every way so that your Marvel functions as you'd expect, in even the most challenging environments.

This new generation of Phonak technology recognizes and automatically adapts to precisely match more listening situations than ever before¹. You can enjoy better speech understanding in noise³, less listening effort⁴ and be amazed at just how well your hearing aids perform in your everyday life. After all, hearing well allows you to participate and communicate more and that results in feeling good about yourself! Combine that with clear sound quality, powerful rechargeable battery technology and smartphone and TV connectivity, well, that's a pretty good reason to love Marvel... all day, every day!

What makes Marvel even more marvelous?

Today's technology is like an ever changing landscape. Phone calls, messages, emails, TV and numerous apps are present in our lives. Phonak Audéo Marvel has been designed to effortlessly connect to your everyday electronics while delivering clear, rich sound.

Smartphone connectivity

Unlike any other hearing aid available, Marvel can connect directly to either your iOS or Android smartphone or other Bluetooth® enabled phones to stream any kind of audio to your ears. With this freedom, you can enjoy true hands-free phone calls with built-in microphones that pick up your voice. Calls can be answered or rejected with a simple push of the button, even if your phone is across the room. In addition, you can even set your phone notifications to be heard through your Marvel hearing aids. And it doesn't stop there, because Marvel delivers stereo sound quality streaming for your music, videos, e-books, podcasts and so much more!

TV and Multimedia Experience

Combined with universal Bluetooth connectivity, Phonak Audéo Marvel also features proprietary AirStream™ technology to deliver top rated sound quality streaming from any TV and stereo system⁵. Enjoy your favorite TV programs and movies with a simple plug and play solution, called Phonak TV Connector.

It's just like using wireless headphones – except maybe even better, because Marvel hearing aids can distinguish between streamed speech and music signals, and automatically adjust to give you an optimized sound quality.

What you can expect:

- Connectivity to smartphones - iOS and Android
- Connectivity to a variety of everyday electronics
- Hearing aids used like wireless stereo headphones
- Extra-long streaming time thanks to AirStream technology

The power of rechargeable technology

Phonak has pioneered rechargeability in the hearing industry with the introduction of lithium-ion rechargeable batteries. Marvel hearing aids are also available with this technology, they are quick to charge and long lasting. This means no more hassles with disposable batteries! Just charge them up and go!

Like your cellphone, Phonak Audéo Marvel are always ready to go as soon as you slip them on. They switch on automatically when removed from the charger and turn off when placed back in the charging case. Enjoy unlimited hearing and streaming throughout the day, thanks to the power of rechargeable technology.

What you can expect:

- Ease of use – no more hassles with disposable batteries
- Full day of hearing including streaming
- Super quick charging
- Battery engineered to last 6 years

Available with easy-to-use charging options, including the new Mini Charger Case with standard USB-C charging outlet.

Boost your performance with Roger™ technology

In situations where loud noise and distance affect your hearing, understanding speech can still be particularly challenging. This is where Roger microphones come in to boost your hearing performance.

Roger technology was developed in 2013, and is regarded today as a wireless digital benchmark. It functions by picking up the voice of the speaker and wirelessly transmitting it to the listener while reducing background noise.

Marvel hearing aids feature RogerDirect™ which allows Roger technology to stream directly to Marvel hearing aids. If you ever feel you need a boost, after a simple installation you can enjoy the benefits of the proven performance of Roger without attaching an external receiver. With this unique innovation, you can fully participate in conversations even in very noisy environments such as restaurants, meetings at work and school activities.

What's in it for you:

- Marvel and Roger, the optimal solution for challenging listening situations
- Designed to improve speech understanding in loud noise and over distance
- Discreet and appealing solutions

Apps-olutely Marvelous!

Phonak's new digital service platform is dedicated to improve your personal listening needs. From the moment you first experience Marvel, you can choose to share information with your hearing care professional. This will allow and enable them to support you, or adjust your hearing aids whenever necessary. The best part is that for follow-up visits you don't have to physically visit your specialist. Everything can be done via the new myPhonak app.

Using the **myPhonak app** you get access to the Hearing Diary and Remote Support services. Your hearing care professional has the ability to customize your personal listening experience in real-time, so that you always get the best out of your Marvel hearing aids.

What you can expect:

- Keep track of your hearing experience
- Real-time remote video support from your hearing care professional
- Confidence and peace of mind that your personal hearing needs are addressed⁶

myCall-to-Text app

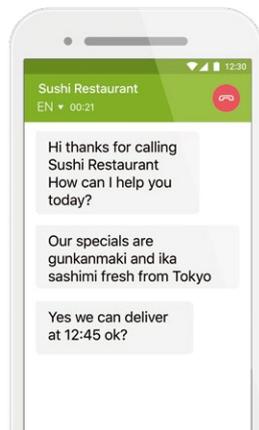

Keeping up with conversations on the phone can be challenging, especially when background noise is present. Thanks to the hands-free capabilities of Marvel hearing aids, you don't have to hold the phone close to your ear. By using the Phonak myCall-to-Text app you can read on the screen in real time, what the person on the other end of the phone says. Just like subtitles on TV or at the movies, you can now read what you hear on your smartphone in more than 80 languages.

Communicate with anyone, anywhere and never worry about missing out on the conversation.

What you can expect:

- Hear and read your phone calls to confidently communicate
- The other person in the conversation can use any type of phone (mobile, office or fixed line) without having to install the app
- Save the transcription for later review

A free version of the myCall-to-Text app is available. Try it out now!
